

Urgent Care Association of America

Roger Hicks, MD

After graduating from Brown University with honors in biology, I received my MD degree from Cornell University Medical College, completed a Family Practice residency at University of California, Davis, and became board certified in Family Practice. I am currently board certified in Emergency Medicine.

Urgent care medicine has been my career since 1996, when I left the ER. In 2000, I opened Yubadocs Urgent Care in my home town. I have been a member of UCAOA since 2006, and serve on the Legislative and Regulatory Issues Committee. Seeing a need for a low cost, service-oriented malpractice insurance option for the urgent care specialty, I was a founding member of the Urgent Care Assurance Company, and serve on its Board of Directors.

I am the medical director and co-owner of Harmony Health Medical Clinic, a Rural Health Clinic in Marysville, CA. I have been a doctor for the Sugarbowl Ski Patrol at Lake Tahoe for 15 years. Community service is important to me. I am gratified that nearly every day, people thank us for the services our clinics provide. Outside my medical practice, I am the founder and a director of one of California's most effective environmental groups.
